SECTION C: Findings of Fact and Conclusions of Law

- 1. GenOn owns and operates the Facility in the Alexandria, Virginia. The Facility, which is the subject of the Permit, is a five unit, 482 megawatt coal fired electric generating plant.
- 2. On July 12, 2011, Department staff conducted a FCE at the Facility to determine compliance with the requirements of the Virginia Air Pollution Control Law, the Permit, and the Regulations. Based on the evaluation and follow-up information, Department staff made the following observations:
 - a. No water fogging system was installed within the enclosure for the bottom ash silo.

- 3. Permit Condition 10 requires GenOn to control fugitive particulate emissions from the bottom ash transfer from the ash silos to trucks or rail cars with a water fogging system within the enclosure.
- 4. On July 15, 2011, GenOn submitted 30-day rolling NOx averages for MS4 for the time period of September 1, 2010, through July 11, 2011. On August 3, 2011, GenOn submitted 30-day rolling NOx averages for MS4 for the time period of April 1, 2011, through July 29, 2011. Department staff conducted a review of this documentation to determine compliance with the requirements of the Virginia Air Pollution Control Law, the Permit, and the Regulations. Based on the evaluation, and follow-up information, Department staff made the following observations:
 - a. The data submitted indicated that the NOx 30-day average for the periods ending on June 28, 2011, July 12, 2011, July 13, 2011, July 14, 2011, July 17, 2011, and July 18, 2011 were each 0.28 lb/MMBtu.
 - b. The data provided and associated exceedances of permitted emission limits, indicated that GenOn failed to properly operate the Facility in a manner consistent with minimizing emissions.
- 5. Permit Condition 28 limits the 30-day rolling average for NOx on MS4 to 0.27 lb/MMBtu.
- 6. 9 VAC 5-40-20(E) requires GenOn, at all times, to maintain and operate the Facility including associated air pollution control equipment in a manner consistent with air pollution control practices for minimizing emissions.
- 7. On August 30, 2011, based on the evaluations and follow-up information, the Department issued a Notice of Violation to GenOn for the violations described in paragraphs C(2) through C(6), above.
- 8. On September 14, 2011, GenOn submitted a written response to the NOV.
- 9. Based on the results of the July 12, 2011, evaluation, and the documentation submitted on September 14, 2011, the Board concludes that GenOn has violated Permit conditions 10 and 28, and 9 VAC 5-40-20(E) as described in paragraphs C(2) through C(8), above.
- 10. GenOn has submitted documentation that indicates that the violations described in paragraphs C(2) and C(4), above, have been corrected.
